

# International School on AstroParticle Physics

## European Doctorate School

The two Schools will cover in a complementary way topics about Astroparticle Physics with regular courses and a few specialized seminars. Participation to both is suggested, but application to only one School is also accepted. Details on the specific programs will be given in the web sites of each School. Limited support to travel and/or living expenses is available. Requests have to be sent to the email address of each School, together with a short C.V.
